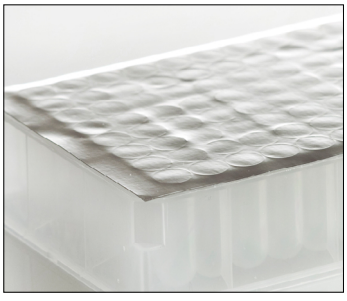
## Azenta Life Sciences Microplate Sealing Film

- Low strength adhesive film
- Transparent and peelable
- Low cost sealing option
- Suitable for temporary storage and as a cover for applications such as centrifugation
- End tabs allow for easy application and removal
- Removable without residue on the plate
- Non pierceable
- Peelable
- Seal integrity range: –20 to 80°C
- Free from DNase, RNase, and human genomic DNA

| Code | Alt Ref | Dims, w x l, mm | Pack | Price |
|---|---|---|---|---|
| **PCR0540** | 4ti-0510 | 80 x 130 | 100 | **£58.00** |

## Azenta Life Sciences DMSO Resistant Foil



- Peelable adhesive foil, strong adhesive, high solvent resistance
- Peelable foil seal with a strong adhesive
- Suitable for long term storage - samples containing <80% DMSO can be stored for up to 5 years
- Certified DNase, RNase and human genomic DNA free

| Code | Alt Ref | Dims, w x l, mm | Pack | Price |
|---|---|---|---|---|
| **PCR0542** | 4ti-0512 | 122 x 80 | 100 | **£233.00** |

## Azenta Life Sciences Moisture Barrier Seals

- Gas permeable adhesive film, optically clear, with adhesive free windows
- Peelable and pierceable
- Sterile
- Suitable for cell culture
- Clear film allowing for a uniform gas exchange, whilst acting as a moisture barrier and preventing evaporation
- Available with 24, 96, or 384 adhesive free, optically clear windows allowing for imaging
- Applications: plate readers, eukaryotic and bacterial cell culture, long term incubation, live cell assays, confocal microscopy
- Certified DNase, RNase and human genomic DNA free

**Supplied in packs of 50**

| Code | Alt Ref | No. of Wells | Dims, w x l, mm | Price |
|---|---|---|---|---|
| **PCR0546** | 4ti-0516/24 | 24 | 80 x 140 | **£184.00** |
| **PCR0548** | 4ti-0516/96 | 96 | 80 x 137 | **£184.00** |
| **PCR0550** | 4ti-0516/384 | 384 | 80 x 137 | **£191.00** |
