The NEW Life Science Catalogue is OUT NOW!

Announcing the second edition of the Scientific Laboratory Supplies (SLS) Life Science Catalogue. This catalogue contains an array of new and exciting ranges to complement our existing Life Science portfolio.

SLS has brought together some of the leading names within the Life Sciences arena to give you a real choice when it comes to selecting consumables, reagents and equipment for all your research needs.

- 40% additional new products
- Compact size - taking up less space and easier to handle
- Fresh new look with additional features for ease of use

To request your NEW Life Science catalogue
Phone us on 0115 982 1111
email us at slsinfo@scientific-labs.com
or visit our website www.scientificlabs.co.uk

Welcome to the Spring 2017 edition of FOCUS

Welcome to the seventh edition of SLS Focus where, twice a year, we bring exclusive budget-stretching offers and exciting new products to you!

This edition brings you fantastic offers across a whole range of laboratory consumables and equipment. With potential savings of over £20k – you can afford to take your time looking through all the products and deals in this edition.

You can also make extra savings with our new 'Flash Promo' offers on those little lab essentials. Look out for them dotted around the brochure.

Remember: These offers are exclusive to SLS and valid until 31st May 2017!

Buy an SLS Lab Basics Mini-Centrifuge and Get a FREE Vortex Mixer (worth £165)

Mini-Centrifuge:

- ✓ Maximum speed 7000rpm/2680xg
- ✓ Supplied with an 8 place 1.5/2.0mL microtube rotor and 16 place (2 x 8 strips) PCR rotor
- ✓ Whisper quiet operation
- ✓ Ideal for quick spin downs of microtubes and PCR tubes

Vortex Mixer:

- ✓ Variable speed from 0 to 2500 rpm
- ✓ Continuous or touch operation
- ✓ Aluminium cast base with silicone feet for excellent stability and vibration damping

* worth £165

Biochrom WPA S800+/S1200+ Spectrophotometers

The small footprint of these spectrophotometers makes them ideal for laboratories where space is at a premium. Great functionality such as the automatic calibration at start-up gives you the confidence you need in your measurements.

- ✓ Graphical display with zoom and track function
- ✓ Visible spectrophotometer covers 325-1100 nm (bandwidth <7 nm)
- ✓ S800+ is ideal for basic spectrophotometric measurements and is great for entry level use
- ✓ S1200+ features more on-board applications such as Bradford, BCA, Biuret and Lowry assays
- ✓ USB PC connection with included PVC (Print Via Computer) software

A&D HR-A/Z Analytical Balances

Top-loading analytical balances with a compact footprint. The breeze break has rotary sliding doors that slide behind the balance and can be removed with one touch. These features make the HR-AZ/HR-A balances ideal for applications where space is at a premium including gloveboxes and controlled environment cabinets.

- ✓ Automatic internal calibration for HR-AZ
- ✓ Reverse Backlit LCD display for easy to read weighing results
- ✓ Statistical calculation function eliminates the need for a stats printer
- ✓ Standard RS-232C
- ✓ Fast compact SHS sensor, response time ~ 2 seconds

VelociRuptor Microtube Sample Homogeniser

The VelociRuptor completely lyses, grinds and homogenises a broad variety of biological samples. The stainless steel tube carrier subjects up to 24 samples to an optimised, high speed, 3D motion, producing high energy impacts between the samples and micro-beads to release cellular contents.

- ✓ 3D rotating high speed motion – for quick disruption of fibrous tissues and resistant cells
- ✓ Eliminates the cross-contamination associated with hand-held homogenisers
- ✓ Faster and more effective than tissue grinders
- ✓ Process up to 24 tubes simultaneously
- ✓ 2 year warranty

Gilson PIPETMAN® L

A lightweight pipette with an ergonomic handle that fits naturally in your hand. The new shape helps ensure a good fit, the larger arched hook reduces tensions while holding the pipette and the thumb is positioned closer to the push button thus reducing overall pipetting forces. PIPETMAN® L features a patented volume locking system for safe, secure pipetting.

- ✓ Patented volume locking system preventing accidental changing of volume setting
- ✓ Adjustable tip ejector button to adapt to both right- and left-handed users
- ✓ Clip mechanism allows easy and safe removal of tip ejector
- ✓ Lowest pipetting forces on the market give increased comfort even when pipetting for long periods
- ✓ GLP features include 2-D bar code for traceability
- ✓ Comes with Gilson's Lifetime Warranty as standard

Gilson Diamond TIPACK Filter Tips

DIAMOND filter tips are designed, developed, and manufactured in order to fit Gilson pipettes perfectly. They ensure optimal performance of your PIPETMAN pipette across the full volume range and prevent aerosol-borne contamination and are supplied in the TIPACK format for ease of use.

- ✓ Optimised geometry and pure polypropylene material ensure complete dispensing for consistent results
- ✓ No risk of contamination -DIAMOND® tips are manufactured under clean room conditions
- ✓ Gamma ray sterilised - indicator dots undergo an irreversible colour change upon sterilisation
- ✓ Full traceability from the mould to the bench guaranteed
- ✓ Easy identification with colour-coded packaging

Astell Benchtop and Compact Autoclaves

FREE Options with Astell Benchtop and Compact Autoclaves (worth £935)

These autoclaves are ideal for laboratory sterilisation procedures with the option of a manual water-fill (Classic models) or integral reservoir (Autofill models). They require no plumbing and operate from a standard single phase power supply. The new touchscreen controller ensures ease of operation for new users, whilst retaining the flexibility and diagnostic capability favoured by lab managers and technical personnel.

- ✓ **FREE** load sensed process timing (worth £350)
- ✓ **FREE** assisted cooling (worth £210)
- ✓ **FREE** service health check within the first 12 months of ownership (worth £375)

CRYOGENICS FROM

CRYOSCience by Taylor-Wharton®

Taylor Wharton is the leading name in cryogenic storage solutions. The range includes simple LN₂ transport right through to long term refrigerated storage systems.

- Wide capacity range from 4L through to 590L
- High performance modern construction assure high thermal efficiency
- Superior vacuum performance gives maximum holding times

**NOW AVAILABLE

Taylor Wharton LS Series Cryogenic Storage

Free Roller Base (worth up to £385) when you buy an LS series refrigerator

The LS series refrigerators are uniquely designed for large vial capacity in convenient box-type storage racks.

- ✓ Dual benefit of large sample capacity and exceptionally low evaporation rates
- ✓ Rack system index location ring and internal spider allows easy location and quick retrieval of samples
- ✓ LS750 holds 25 vial boxes in 5 x 5 matrix
- ✓ LS3000, LS4800, LS6000 hold vial boxes in 10 x 10 matrix
- ✓ All units supplied complete with racks

O₂NE+ Oxygen Depletion Safety Monitor

The widespread use of N₂, LN₂, He or Ar in laboratories poses a potential asphyxiation hazard to personnel. If an inert gas leaks or builds up in a confined area it can deplete the O₂ to dangerously low levels. The O₂NE+ is a simple to use, wall mounted oxygen depletion monitor which has 2 audible/visual alarms which will trigger at 19.5% and 18% O₂ which means that lab personnel can take evasive action in the event of a gas leak.

- ✓ Long life, low drift sensor lasts up to 7 years
- ✓ Minimum calibration check required - only every 12 months (user maintainable)
- ✓ Supplied with a relay on the 2nd alarm (18%) which can be used to trigger ventilation, extraction or a building management system
- ✓ Simple to read "OK", "Alarm" and "Fault" states
- ✓ Easy installation and maintenance can be conducted by the user
- ✓ Additional (quick connect) alarm repeaters available if more than one entrance to the laboratory
- ✓ Assists in compliance with Exposure Limit regulations such as EH40
- ✓ Delivery Includes: Main O₂ sensor unit with relay on 2nd alarm and 1 alarm repeater to be placed at the entrance, with mains power supply

3M Clean-Trace Hygiene Monitoring and Management System

The newly redesigned Clean-Trace luminometer features improved ease of use, faster time to result and simple, one-handed operation. Its ergonomic design makes testing simple, minimising training time and costs. With a higher degree of repeatability and the lowest variability in the industry, you'll get accurate results you can count on.

Featuring a redesigned dashboard for a quick and easy way to create, store and retrieve reports, Clean-Trace hygiene management software turns data into information, helping you to identify root causes and take action quickly. Now even easier to use and more intuitive with convenient wireless and networking capabilities. Put your data to work identifying workplace trends, optimising productivity and adding value to the process.

- ✓ Uses 3M™ Clean-Trace™ ATP test swabs
- ✓ Intuitive, user-friendly software optimises productivity
- ✓ Automates data transfer, report generation and delivery
- ✓ Computer not included

Bellingham + Stanley Abbe 5 Refractometer

The Abbe 5 is an affordable refractometer ideally suited for use where a wide refractive index measurement range is required such as in small contract laboratories or applications where sample throughput is relatively low. The instrument is also ideal for practical demonstrations and experiments in chemistry and physics laboratories in schools, colleges and universities. Waterbath connections provide prism temperature control facilitating accurate readings to 4 decimal places RI (1 decimal Brix).

- ✓ Dual scale: refractive index & 0-95 Brix
- ✓ Dispersion measurement
- ✓ Optional light source (sold separately)

Ax60+ Carbon Dioxide Safety Monitor

The use and storage of CO₂ in laboratories is varied and increasing in popularity including use in CO₂ incubators, glove boxes, in dry ice form for storage, carbonation and many more applications. CO₂ is dangerous, even at relatively low levels and a leak or build-up of CO₂ in a confined area could prove potentially lethal for lab personnel. The Ax60+ comprises of a wall mounted central display unit, a CO₂ sensor and a CO₂ alarm which can provide an early warning of a CO₂ leak.

- ✓ No calibration required (unless local regulations state otherwise)
- ✓ Very long life sensor can last up to 15 years
- ✓ Up to 4 x CO₂ sensors and 8 x CO₂ alarms can be used per central display unit
- ✓ Supplied with a relay on each alarm which can be used to trigger ventilation, extraction or a building management system
- ✓ Easy installation and maintenance can be conducted by the user
- ✓ Additional (quick connect) CO₂ sensors and alarms available if more than one entrance to the laboratory or more than one risk area
- ✓ Assists in compliance with exposure limit regulations such as EH40
- ✓ Delivery Includes: 1 x central display unit with 2 relays, 1 x CO₂ Sensor and 1 x CO₂ alarm, complete with universal mains power supply.

Code	Description	List Price, £

MyGo Mini Real-Time PCR

The MyGo Mini system delivers affordable qPCR without compromising data quality. The system is easy to use and can run up to 16 samples using 0.1mL tubes. The system features fast heating and cooling and incorporates a heated lid design. It is ideal for a large range of applications including: research, teaching, diagnostics, veterinary and food testing.

- ✓ Automated analysis modules for:
 - absolute and relative quantification
 - melting curve analysis
 - endpoint genotyping
 - high resolution melting (HRM)
- ✓ Quick start using templates for all major applications
- ✓ Analysis of full spectral data
- ✓ Generation of custom dye files for novel fluorophores
- ✓ Straightforward setup and editing of sample and target information
- ✓ Comprehensive data export functions
- ✓ Compatible with Windows, Mac & Linux Systems
- ✓ Instrument start from a USB flash drive, using pre-programmed settings
- ✓ Number of reactions: 16
- ✓ Format: 0.1mL tubes
- ✓ Dims, w x d x h, cm: 12 x 12 x 16

Supelco Visiprep™ SPE Vacuum Manifolds & Accessories

Visiprep™ solid phase extraction vacuum manifolds and accessories automate the preparation and cleanup of laboratory liquid samples by solid phase extraction.

The manifold rack accommodates autosampler or small scintillation vials, 10mm or 16mm test tubes, or 1, 2, 5 or 10mL volumetric flasks. An optional plate fits up to ten 20mL scintillation vials in the 12-port model.

The standard manifold lids are equipped with Teflon solvent guide needles, to provide an inert flow path for your samples.

- ✓ Extract up to 12 or up to 24 samples
- ✓ Vacuum bleed valve for precise flow control
- ✓ Glass basin, which will not fog or discolour when exposed to powerful solvents, with optional polypropylene splash guard inserts
- ✓ Optional disposable valve liners eliminate cross contamination
