

**SCIENTIFIC
LABORATORY
SUPPLIES**

Corning DeckWorks™

THE environmental solution for racked pipette tips

Minimise your plastic waste by switching to Corning DeckWorks™.

In addition Scientific Laboratory Supplies can collect your refill wafers and surplus racks for recycling.

See overleaf for further details

SERIOUS about the environment?

SLS are!

SLS can offer a complete solution for all your liquid handling requirements:

• **Pipette Tips**

Corning® DeckWorks™ Reload Systems

Corning DeckWorks pipette tip system is designed to allow you to maximise storage space and help reduce the production and waste of plastic materials.

Key Features

- ✓ No need to throw away your boxes - with Corning DeckWorks™ only the “wafer” is disposed of.
- ✓ Boxes can be re-used time after time with the easily loaded tip refill system
- ✓ Decks fit racks of multiple brands
- ✓ Decks and racks are made from recycled plastic

To Order

Code	Description
4125	1 - 10 µL Corning DeckWorks™ Reload System
4126	1 - 200 µL Corning DeckWorks™ Reload System
4129	100 - 1000 µL Corning DeckWorks™ Reload System

• **Pipette Box Waste Bin Collection Service**

Our unique ‘Tip box’ recycling service offers our customers a free of charge and simple way to recycle their waste tip boxes, inserts and ‘wafers’. Exclusive features include:

- All brands of tip box accepted, no sorting required.
- Free waste bin supplied
- Simple registration process, no need to complete paperwork with each collection.
- Collections arranged via our own vans at the convenience of our customer.
- Recycled in a dedicated laboratory waste recycling facility

SLS are accredited with the ISO:14001 environmental management standard

For more information about recycling or sustainability visit www.scientificlabs.co.uk/sustainability, where you can download our tip box recycling forms or email us on: slsrecycling@scientific-labs.com

• **Pipette Servicing and Calibration**

SLS are pleased to present our customers with tailored and flexible servicing and calibration for all pipetting and manual liquid handling needs. Servicing and calibration is available as a “Back to Base” service or through on-site clinics (note, minimum of 20 UKAS or 25 non-UKAS pipettes required for on-site clinics)

To request FREE samples of Corning DeckWorks™ / enquire about special pricing or calibration, please contact your local Territory Sales Manager or your nearest sales office
