

Hamilton Removable Needles

HAMILTON

Removable needles give you the benefit of a replaceable needle for the occasional bend or clog, and the minimal dead volume of a cemented needle. The unique removable needle design installs the needle precisely at the zero line. Standard needle length is 51mm.

Small Hub

Compatible with removable needle syringes that are 100µL and smaller.

Supplied in packs of 3

Code	Alt Ref	Gauge	Description	Price

Hamilton Luer Lock Needles

HAMILTON

A large selection of needles that are compatible with Luer Lock syringes. Luer Lock is an industry standard tapered termination utilised by most syringe manufacturers including medical hypodermic syringes. Metal hub (nickel plated brass) needles can be used with TLL syringes and LT or TLL connectors. The needles are 304 stainless steel. Standard needle length is 51mm.

Supplied in packs of 6
