

## Roche X-tremeGENE™ HP DNA Transfection Reagent

- · High-performance reagent
- Optimised formulation for transfecting a broad range of eukaryotic cells, including insect cells and many hard-to-transfect cell lines
- Achieve new levels of transfection efficiency for difficult to transfect cell lines
- Benefit from an easy to use reagent, free of animal-derived components and active in serum-containing medium
- Increase experimental throughput using a simple and fast protocol

Code	Pack	Price
6366236001	1mL	£434.00

## Thermo Scientific™ Gibco™ Advanced Bioprocessing Media

- An expanded selection of speciality media products to help you achieve optimal production yields, while minimising media development time
- · Nutrient rich media, designed to specifically increase production and titre in large-scale biopharmaceutical applications

## **Animal Free**

- AOF peptones used to enhance the performance of basal or platform media, while offering a lower risk alternative to animal-based supplements
- Unique blends of yeast and soy peptones, which are high in carbohydrates and amino acids, provide essential nutrients to increase cell culture performance and protein production across a variety of cell lines and applications, including the production of vaccines, monoclonal antibodies, and biosimilars
- Stringent manufacturing and quality control procedures help to reduce variability to give you a more consistent product
