DURAN® GLS 80® Baffled Laboratory Bottles

- More effective mixing due to three moulded in, vertical baffles
- Manufactured from borosilicate glass 3.3
- Flat inner base
- Baffles form a continuous, smooth inner surface making clean up easy
- Easy access to the bottle contents due to the wide diameter of the bottle neck
- Special thread design for rapid opening and closing in less than a turn
- Stability due to the large base area
- Easy to read scale with graduation marks to estimate the content
- Fired on, highly durable white ceramic
- Special GLS 80® thread design for rapid opening and closing in less than a turn

DURAN® protect Laboratory Bottles

- Safety coated version of the standard laboratory bottles, combining the best of both worlds: virtually inert USP/EP Type I borosilicate glass 3.3 glass on the inside and a protective safety plastic layer on the outside
- High performance materials and robust ISO 4796-1 design provides a long working life
- Easy to read graduated volume scale, and marking field in permanent white enamel
- Permanent retrace code on each bottle for manufacturing lot traceability
- Safety coating meets the requirements of ASTM E1522
- Fully autoclavable
- External polymer coating provides scratch, leak* and splinter* protection (*2L bottles and less only)
- Highly resistance, long service life coating
- UV protection up to approx. 380nm due to external coating
- Complete with screw cap (PP, integral lip seal) and pouring ring (PP) for drip free pouring and clean, safe working
- Size 10 has specially shaped glass edge for improved pouring out (so that an additional plastic pouring ring is not required)
