

Eppendorf 5702/5702 R/5702 RH Centrifuges

eppendorf

The 5702 family of low speed, general purpose centrifuges was especially designed to meet the requirement of low to mid throughput research and cell culture labs. They are compact in design so that one can fit comfortably on every lab bench, quiet in operation to benefit your work environment, and provide 6 different rotor options to accommodate any type of tube. Choose the 5702 for standard applications, the refrigerated 5702 R for heat sensitive samples, or the heated and refrigerated 5702 RH for centrifugation under biological conditions to improve cell viability for more accurate results in downstream applications.

- Very compact footprint to fit on every lab bench
- Very quiet operation to benefit your environment
- Low access height for simple loading and unloading of samples
- SOFT brake function for slow acceleration and braking
- "At set RPM" function starts the timer when the selected rotational speed is reached for reproducible centrifugation runs
- Key lock to prevent unintentional adjustments
- Stainless steel rotor chamber is rust free and easy to clean
- Electronic imbalance detection for maximum safety
- Timer: 0 – 99 min, with continuous run function
- FastTemp® function for fast pre-cooling (5702 R/5702 RH)
- Continuous cooling maintains a constant temperature after the run has been completed (5702 R/5702 RH)
- ECO shutoff engages after 8 hours of non-use to reduce energy consumption and extend compressor life (5702 R/5702 RH)
- Active heating guarantees high temperature accuracy during the entire centrifugation cycle (5702 RH)
