

Simport® Scientific Embedding Cassettes

Disposable plastic tissue cassettes suitable for holding and identifying tissue samples in processing, embedding and sectioning procedures.

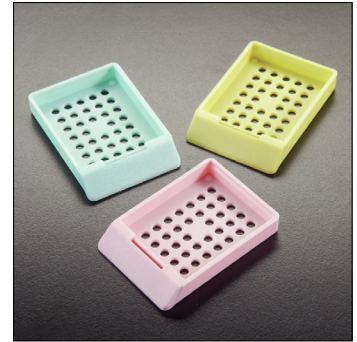

- Fit securely in microtome chuck adapters
- Resistant to the chemical action of most histological solvents
- Slanted writing surface accepts markings easily, permitting sample identification throughout all stages of embedding and long afterwards when in archives
- Made of acetal
- Metal lid sold separately (HIS0020)
- Other colours are available, please enquire

Supplied in packs of 1500 (3 dispenser boxes of 500 cassettes)

Code	Alt Ref	Colour	Price
HIS0009	M480-2	White	£175.00
HIS0010	M480-3	Pink	£175.00
HIS0011	M480-4	Green	£175.00
HIS0012	M480-5	Yellow	£175.00

HIS0020	M481	25	£82.00

Simport® Scientific Histosette® I Cassettes

Disposable plastic cassettes specially designed to hold biopsy or tissue specimens during the embedding process as well as in a storage file. Moulded from a special high density polymer, these cassettes keep specimens safely submerged in liquid and are totally resistant to the chemical action of histological solvents.

- One piece integral lid eliminates the need for separate steel lids
- Just snap apart and conveniently lock the lid into the base of the cassette
- Can be opened or closed as often as necessary and they always relock securely without danger of specimen loss
- Anterior writing area at a 30° angle
- Made of acetal plastic

Supplied in cases of 1500 (3 dispenser boxes of 500 cassettes)
