## Tough-Tags® Labels

- Chemically inert labels that strongly adhere to microtubes, test tubes, storage boxes and other microscope slides
- Temperature resistant from -40 to 121°C
- Withstand autoclaving, boiling water baths, freezer temperatures, organic solvents and caustic agents
- For best adhesion it is recommended that siliconised surfaces be avoided
- Perfect for accurately identifying important samples stored in tubes, microplates or boxes that will be autoclaved or stored in moderate freezer temperatures
- Please contact us for the full range of colours and formats
- Also available in printable sheets
