Cerillo Stratus Mini Plate Readers

The Stratus plate reader is small enough to fit in the palm of your hand and allows for measurement collection in small spaces, on shared or modular benchtops, and even in restrictive environments, like anaerobic or microaerophilic chambers and incubators. Its uniquely simple, standalone interface and on-board data storage allow it to be placed anywhere, with or without a computer.

- Continuous real time measurements of optical density
- Standard 6, 12, 24, and 96 well plates
- Small footprint and stackable
- No moving parts; minimal maintenance
- Functional in a broad range of environments
- User friendly software
