## Accuris SmartWasher™ 96 Microplate Washer

Automate the process of ELISA plate washing so assays can be prepared quickly, accurately, and with confidence for absorbance reading. Full plates, partial plates, and strips with U, V, C, or flat bottoms are accepted by this fully automated washer. Multiple aspiration point settings allow for minimal residual liquid in the wells after aspiration.

- Precision control of aspiration needle position, accurate to 0.1mm, minimal residual liquid,  $\leq 1\mu\text{L}/\text{well}$
- Auto rinse function eliminates cross contamination
- Up to 100 wash protocols can be customised and stored
- Liquid level sensors in wash and waste bottles
- Wash protocols can be transferred via flash drive
- All parameters, including dispense volume, suction time, soak and shake cycles, and shaking speed are easily programmed using the large 4.3" LCD display and keypad
- Comes equipped with 2 wash bottles, 1 rinse bottle and a waste bottle
- All bottles have sensors that alert the user when the solutions are low, or in the case of the waste bottle, when it needs to be emptied

## Manifolds

8 and 12 channel manifolds are available separately to accommodate plates in either orientation. A transparent, acrylic shield surrounds the wash area, allowing for visualisation of the plate. Should a spill or leak occur, the bevelled spill well ensures that the liquid is extracted immediately to avoid cross contamination.
