

Eppendorf Research® plus Move It® Pipettors with Adjustable Tip Spacing

eppendorf

Do you frequently transfer samples between different vessel formats, such as between tubes and plates, and strive for more efficient and safe solutions? The new adjustable tip spacing pipette Move It® accelerates and simplifies synchronous pipetting of a series of samples. A unique design without tubing connections results in increased precision and durability as well as user and sample safety.

- Efficient sample transfers from one vessel type to another.
- Pre-defined settings allow for quick switches back and forth between different formats
- Tip spacing freely selectable between 4.5 and 33mm
- Time saving thanks to rotatable pipette head - 360°
- Tubeless system for reliability and reproducible results - no cable tangle and tubing-porosity, for consistently reliable robustness and precision
