

## Sharpsafe® Sharps Containers, Yellow

- Safe and cost effective solution for the disposal of healthcare waste
- Semi translucent lid means the contents are visible when full
- In mould label offers permanent audit trail which cannot be removed
- Community model is designed for use in the community setting and fits neatly into a bag or pocket, the flip top lid combines security with ease of use whilst the final locking feature ensures total security during transportation for final disposal
- Quiver model is designed for the safe disposal of specialised surgical instruments, it can hold up to 7 laparoscopic instruments and has a fluid tight adhesive seal to prevent any liquid leakage after final closure

Code	Capacity, L	Pack	Price

## Econix Bio-Bin® Clinical Waste Bins

- For non sharp waste disposal
- Designed to reduce your costs and CO<sub>2</sub> emissions when disposing of infectious and other waste materials
- Paper base construction significantly reduces the amount of plastic and weight sent for final waste
- Fold flat design saves storage space
- Constructed of 96% paper – often cheaper to dispose of compared to plastic bins
- Eco-friendly
- Each empty bin weighs just grams, so doesn't add more cost to your disposal bill
- Designs reflect DOH waste segregation guidelines
- UN 3291 approved container, no additional packaging required for transport
- Fully autoclavable
- Loop Bio-bin® has a longer base to allow single use implements such as loops, swabs and non-sharp surgical instruments (e.g. nippers and scissors) to lie flat in the bottom, reducing wasted space
