MultiSUB Maxi

Available with 200 x 250, 200 x 200 and 200 x 100mm gel trays, MultiSUB Maxi is multichannel pipette compatible with gel trays that correspond to standard blotter sizes allowing for rapid loading, separation and transfer of samples during Southern and Northern analysis and genomic library preparation.

UV transparent gels trays allow up to 550 samples to be run, the long length allows for high resolution, extended separations whilst high specification injection moulded casting dams allows gels to be cast externally whilst the tank remains in use. Comes complete with 2 x 20 sample combs, loading guides and dams.
