EXCLUSIVE OFFERS & EXCITING NEW PRODUCTS

Brought to you by the UK's largest independent supplier of scientific products

WELCOME

FOCUS September 2020 Edition ____

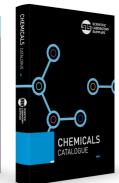

Welcome to another bumper issue of FOCUS! With great exclusive offers on products from market leading manufacturers such as Eppendorf, Ohaus, Bioline, Gilson, Sartorius, Cytvia plus many more. You will also find some great prices on our own SLS branded ranges.

Throughout this edition you will find products suitable for the disinfection and control of COVID-19, helping you to make your working environment safer.

REMEMBER:

These offers are EXCLUSIVE to SLS and valid until 31st December 2020

NEW Catalogues Out Now!

The 2020/21 main SLS laboratory product catalogue is available now and includes 20% NEW products. We have also launched our chemicals catalogue featuring products from leading brands: Honeywell Fluka™, Honeywell Riedel-de Haën, Hydranal™, Chromasolv™, Reagecon and our own brand SLS Select chemicals - whatever your application you're sure to find the product to suit your needs.

Eppendorf CellXpert® C170 (2) and C170i CO₂ Incubators

eppendorf

Ensuring the reproducibility of experiments by minimising atmospheric fluctuations inside the incubator, with fast temperature and CO, recovery in less than 5 minutes without overshoot and advanced microprocessor control. Featuring a fan-less design for increased capacity, lower operating costs, and less opportunity for contamination.

- No internal HEPA-filters that potentially contaminate the chamber after HTD
- Seamless interior to minimise possible points of contamination
- Easy access USB ports
- Intuitive user interface
- Dual-channel infrared CO₃ sensor
- Capacity 170L
- Temperature range +4 to +50°C
- CO, range 0.1 to 20%

Eppendorf 5702 Centrifuges

eppendorf

The 5702 family of low speed, general purpose centrifuges was especially designed to meet the requirement of low- to mid-throughput research and cell culture labs.

- SOFT brake function for slow acceleration and braking
- "At set RPM" function starts the timer when selected rotational speed is reached
- Electronic imbalance detection for maximum safety
- Timer: 0 to 99 min, with continuous run function
- FastTemp® function for fast pre-cooling
- Continuous cooling maintains constant temperature after the run
- ECO shut-off engages after 8 hours of non-use

• Centrifugation speed up to 3,000 \times g (4,400 RPM)

Eppendorf 5910 R Refrigerated Centrifuges - IVD Versions

eppendorf

The 5910 R refrigerated centrifuge combines high capacity and performance in a compact and ergonomic product design. It comes with a modern user interface and an advanced temperature management system.

- Aerosol-tight Eppendorf QuickLock® caps and lids
- Centrifuge lid with soft-touch lid closure
- Automatic rotor recognition and imbalance detection
- FastTemp® function for quick pre-cooling
- FastTemp pro® function for automatic pre-cooling
- Continuous cooling maintains temperature after the run
- ECO shut-off engages after 8 hours (adjustable)
- Timer: 10s to 99h 59min, with continuous run function, short-spin

• Centrifugation speed up to 22,132 \times g (14,000 RPM) For IVD use

Eppendorf 5920 R Refrigerated Centrifuges - IVD Versions

eppendorf

The 5920 R refrigerated centrifuge delivers extraordinary high capacity in a very compact and ergonomic product design. Featuring a superior capacity of up to 4 x 1000mL, a powerful state-of-the-art refrigeration system and advanced temperature management, the 5920 R is the ideal instrument for high-throughput applications.

- Aerosol-tight Eppendorf QuickLock® caps and lids
- Centrifuge lid with soft-touch lid closure
- Automatic rotor recognition and imbalance detection

Eppendorf Mobile Centrifuge Tables NEW

eppendorf

Free up bench space or lower the operating height of your centrifuge for a more ergonomic work environment. You can also transport and use the centrifuge in other labs. Available in two heights - a low design model for under bench storage of your centrifuge, or a high design model for ergonomic loading and unloading of rotors and samples.

- Suitable for 5804/5804 R, 5810/5810 R, 5910 R or 5920 R centrifuges
- Sturdy design for safe centrifugation
- Equipped with heavy-duty transport wheels and brakes
- Ready to use no assembly necessary

Eppendorf Cryocube® F101h ULT Freezer

eppendorf

Combines compact design with real -80°C to offer long-lasting and reliable ULT technology for safe sample storage. Ultra-efficient, compact vacuum insulation panels are used in combination with traditional PU foam insulation, slimming down the freezer wall thickness from 130 to 80mm. This gives a small footprint, limited to half a square meter, while still having space for up to 6000 vessels (1.5mL). Inner doors are gasketed as well as insulated creating 2 separate compartments minimising cold air loss while you access your samples. Special low-temperature outer door seals allow gaskets to remain flexible at -86°C and prevent ice buildup for easy access to samples.

- Easy-to-read LED control panel and alarm status
- Special vacuum vent with plunger ergonomically located to gain immediate access
- Inner doors can be quickly removed for easier and faster defrosting
- Full stainless steel interior for easy cleaning; powder-coated steel exterior
- Password protection of alarm and temperature setpoints to prevent unauthorised setting changes

The Next Benchmark

The Centrifuge 5910 R sets the next benchmark in versatility, capacity and user 36 x 50 mL conical convenience.

Its main swing-bucket rotor holds both conical tubes and plates – no need to change rotor buckets or adapters. This improves handling and saves time.

- > Max. capacity: 4 x 750 mL or
- > Excellent rotor versatility
- > Modern operating system with outstanding functionality
- > Advanced temperature management that keeps your samples safe

Gilson PIPETMAN® M Connected Pipettes

GILSON®

The PIPETMAN® M Connected Bluetooth enabled electronic pipette offers accuracy and precision in both standard and repetitive modes. Connect the pipette to the Gilson PipetteScope™ app and know exactly when the pipette needs to be calibrated, access service history reports and gain visibility of the pipette usage analytics. With the PIPETMAN® M Connected software, create custom protocols. Used together with TRACKMAN® Connected, the pipette interacts in real time with the device to plan, execute and track pipetting protocols.

- Motorised piston allows for high pipetting reproducibility and accuracy
- Requiring virtually no pipetting forces to aspirate and dispense samples
- Helps reduce pipetting fatigue and increase pipetting efficiency

Tristel JET Surface Disinfectant

JET is a powerful sporicidal disinfectant and a cleaner, destroying RNA and DNA in seconds. Its cleaning efficacy meets the requirements of a medical instrument cleaner, effectively reducing levels of protein and carbohydrate. It is sporicidal, mycobactericidal, virucidal, fungicidal and bactericidal in one minute. It has been tested in accredited laboratories and is proven effective against a wide range of microorganisms.

- Uniform contact time of one minute
- 1st level of compliance to all applicable EN standards
- Active ingredient: chlorine dioxide
- 570 doses of foam per bottle
- Efficacy with the standard wipe in EN 16615 means JET can be used with any sustainably sourced wipe, avoiding the use and waste of plastic wipes

Sartorius Proline Plus Pipette (2) Multipacks

SARTURIUS

The Proline Plus pipette family offers a robust design and is suitable for every day laboratory applications. Covering $0.1\mu L$ to 10mL and available as single and multichannel variants.

- Reduced pipetting forces help prevent RSI
- Accurate and precise performance
- Contamination free pipetting with safe-cone filters
- Robust design and easy to maintain
- Fully autoclavable

SLS Lab Pro Pipettes

The SLS Lab Pro pipettes offer superior quality at an affordable price. These are lightweight pipettes with a handle that fits naturally in the hand. They feature a volume locking system for safe, secure pipetting. A lubricated piston assembly offers very light pipetting forces.

- Adjustable tip ejector button to adapt to both right- and left-handed users
- Clip mechanism allows easy and safe removal of tip ejector

BRAND Dispensette® S Bottle Top Dispensers

Make dispensing liquids safer and easier. The Dispensette® S operates smoothly, requiring minimum effort when filling and dispensing.

- Easy to calibrate and adjust in order to comply with ISO 9001 and GLP guidelines
- Autoclavable at 121°C
- Easy to dismantle for cleaning
- Replaceable filling and discharge valve with safety ball
- Valve block can be rotated 360° so that the bottle label faces

the user for safety

+ FREE Flexible Discharge **Tubing Worth** £69.55

Dispensette® S Analogue-Adjustable

Ideal for dispensing aggressive reagents. Colour code: red.

SLS Lab Pro SM Series Micro 5 **Analytical Balances**

The SLS Lab Pro SM Series of balances have been developed for high end micro weighing with the automatic elimination of static electricity at a competitive price. A built in fanless ioniser eliminates static and a large weighing chamber with interlockable slide doors allows operation with either hand.

- One touch automatic calibration
- Internal data memory function for up to 200 sets of data
- GLP/GMP/GCP/ISO compliant output

• Built-in temperature, humidity, and atmospheric pressure sensors

- RS-232C and Quick USB interfaces as standard
- AD-1688 weighing data logger as standard

Sartorius Entris® II Advanced 2 NEW **Analytical Balances**

SARTURIUS

No matter what you are weighing, the new Entris® II balance is always the right choice, offering unrivalled value and backed by almost 150 years of German engineering expertise. Featuring monolithic weigh cell technology for highly accurate results year in and year out, the fastest stabilisation time in its class using state-of-the-art weighing sensors, a graphic touch display and 13 built-in application programs.

- Built-in real-time level support
- Integrated protection systems with 3 configurable levels to determine valid weighing data and ensure only valid data is transferred to external devices
- High chemical resistance
- Hybrid screen for excellent readability and use combines intuitive, wear resistant LED and touch technology
- Controlled access to balance settings with user management
- Gapless documentation thanks to CalAuditTrail
- Enables multiple connection to external devices via two USB Type C interfaces
- Allows individualised printouts for up to 6 unique profiles
- Password protection for secure operation

Scientific Industries Vortex-Genie Mixers (2)

The Vortex-Genie 2 is a variable speed vortex action mixer which offers gentle to vigorous shaking or low to high-speed vortex action. The 2T adds an integrated mechanical timer of 1 to 60 seconds for touch operation and 1 to 60 minutes. The digital model is fully programmable with digital control and display of speed and time.

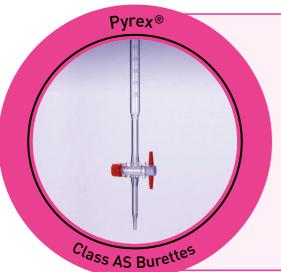

- Broad range of attachments for most tubes, plates and other containers
- Suitable for use in cold rooms and incubators
- Supplied with pop-off cup and 3" platform
- Dims, w x d x h: 122 x 165 x 165mm

• Weight: 4kg

SLS Lab Basics Mini Vortex Mixer

A simple, touch start operation enables exceptional mixing performance with one handed operation, and shaking stops when the tube is lifted.

- Non-slip feet ensure the unit stays in place
- Made from durable ABS and silicone materials to resist most commonly used chemicals
- Quiet operation with low vibration, noise level (full speed, unloaded): 53dB
- Can be used with tubes ranging from 2 to 50mL
- Supplied with replacement silicone cap and universal power adapter

SLS Lab Basics Mini Magnetic Stirrer

Ideal for routine stirring applications.

- Quiet operation with low vibration, noise level (full speed, unloaded): 53dB
- Low-profile design with a small footprint
- Made from an ABS and PC blend that is chemical resistant and easy to clean
- Supplied with 2 stir bars (9 x 35mm) and universal power adapter

OHAUS Light Duty Orbital Shakers

Light duty shakers are designed for applications with loads up to 4kg. Easy-to-read, independent LED displays for speed/time allow the operator to view all settings simultaneously (digital models) and basic control knobs with dial markings for speed/time (analogue models).

• Triple eccentric drive systems for stable shaking with microprocessor-control

• Choose from two orbit and speed ranges to optimise your sample mix

- Microprocessor-controlled
- Detachable 3-wire cord and plug included
- Non-slip mat (299 x 222mm) included with all models except the microplate shaker
- Dimensions: 108 x 413 x 260mm

SLS Flowgen Plate Spinner

Rapidly spin down droplets in PCR or microplates to improve PCR yields or give more consistent assay results. The swing out rotor has two plate carriers that rest at a 75° angle. This allows plates to be inserted confidently without sealing tapes or caps. Most samples can be spun down in less than 20 seconds.

- Unique swing-out rotor design prevents spillage
- Accepts most types of PCR plates
- Capacity: 2 x PCR plates (when stacking skirted PCR plates, max. capacity is 4 plates); 2 x microplates

Axygen® PlateMax® Semi Automated Plate Sealer

Ideal for the low-to-medium throughput laboratory that requires uniform and consistent sealing of microplates. Offering complete versatility, the PlateMax® sealer will accept a full range of plates for PCR, assay or storage applications. It can be used to seal a wide range of plate heights.

- Compatible plate materials: polypropylene, polystyrene, polyethylene
- Compatible plate types: standard assay plates, deep well storage plates, PCR plates
- Includes adapters for standard and deep well microplates
- Sealing parameters are set and displayed via the user-friendly control panel
- Sealing operation is automated to ensure consistent results

Bioline SensiFAST™ cDNA **Synthesis Kits**

- Efficient high-target affinity, coupled with a novel TransAmp buffer system for improved yield of fulllength cDNA
- Unbiased optimised mix of random hexamers and anchored oligo dT primers for complete 5' to 3' RNA sequence representation
- Sensitive lower Ct values from a broad range of input cDNA concentrations, enabling accurate detection of very low-copy targets
- Robust reliable reverse transcription under challenging conditions, including complex templates and in the presence of inhibitors
- Fast high-yield reverse transcription from a very broad of targets in as little as 5 minutes
- Complements the SensiFAST™ Probe and SYBR® kits

Techne Prime G Gradient Thermal Cyclers

The ³Prime G and Prime G personal thermal cyclers are designed for easy programming via a touch screen interface. Pre-installed ready to go templates allow the user to quickly create complicated programmes and a USB connection allows the transfer of temperature programmes

and logs between instruments and PC. The Prime G has a wide linear gradient with a range of 29°C. The gradient calculator function displays the temperature for each of the 12 columns, ensuring easy replication of thermal conditions.

- 1000 program capacity
- 0.2 or 0.5mL blocks available
- Temperature range 10 to 100°C, 4°C final hold
- 3°C/sec ramp rate

InGenius 3 Gel Documentation System

Using a compact InGenius 3 gel documentation system, you're in control. You can image your choice of dyes and stains by choosing UV, blue or white lighting options. The system's GeneSys software selects the right lighting and filters for you, making it easy to image fluorescent ethidium bromide or SYBR® Safe DNA gels and protein gels stained with Coomassie Blue or silver. The InGenius3 offers a 3m pixel camera and can produce images with 16 bit image depth. A manual zoom lens and

manual filter drawer (includes a UV filter) completes the package. Controlled by GeneSys application driven image capture software and comes complete with unlimited copies of GeneTools analysis software.

- 3m pixel camera detect nanogram amounts on gels (up to 20 x 20cm)
- High resolution

FREE slimline, single wavelength slide-out transilluminator with runners - 20x20cm, 302nm

Benchmark myBlock™ Digital Dry Bath

Benchmark's myBlock[™] series include advanced microprocessor controls, timed or continuous operation and a removable hinged lid. The myBlock's[™] transparent lid helps to promote better uniformity and minimise temperature stratification in the block by maintaining a warm

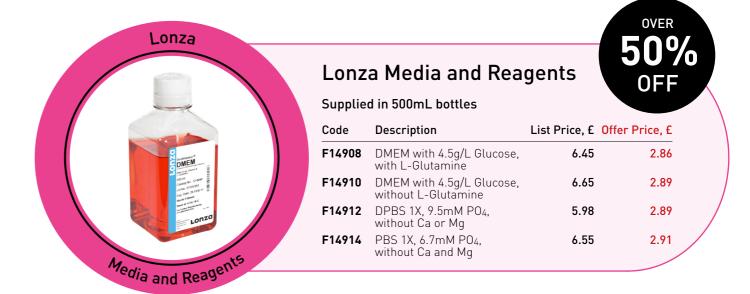

air jacket layer. It also helps to reduce energy consumption by minimising heat loss to the environment.

Includes two Quick-Flip™ universal blocks which accept tubes from 0.5 to 2.0mL and accommodate 0.2mL tubes, PCR strips or a PCR plate. Other blocks are available for tubes up to 50mL.

- Digital temperature control (set and walk away)
- Hinged lid (improves uniformity & conserves energy)
- External (optional) temperature probe measures actual sample temperature

Leica DM500 Configurable Microscope Package

Over

The Leica DM500 microscope is the ideal tool to make teaching entry-level college and university Life Science courses easy and fun for the instructor and the student. Student-friendly features such as the prefocused, pre-centered condenser and the EZTube™ preset diopter, which prevent incorrect adjustments, provide more time for hands-on teaching. EZStore™ design with integrated handle and cord wrap allows easy carrying, easy lifting

and protection against microscope component damage. LED illumination provides cool, white light with a lifetime of over 20 years average use. There is no need to change lamps during lab time, and this saves the expense of replacement lamps.

Package includes:

- Right hand stage, standard stand with condenser
- Binocular tube 45 degree
- Plan objective set 4x, 10x, 40x, 100x
- Eyepiece 10X/20 focusable with eyeguard
- UK cord set

Biochrom WPA Biowave 3+ Colour **Touch Spectrophotometers**

0FF

The Biowave 3+ Colour Touch diode array spectrophotometers offer all the benefits associated with the established WPA Biowave range. Predefined life science methods for nucleic acid, protein and microbial culture quantification and analysis, combined with the rapid scanning, kinetics and concentration capabilities, and their compatibility with disposable low volume UV cuvettes, have made them a common site among education and industrial laboratories alike.

• Wavelength range: 190 - 1100nm allows you to see more of your sample

• Wavelength accuracy: ±2nm

• Spectral bandwidth 3nm

• Xenon light source

- Save data to a USB flash drive so results can be analysed later
- Colour touch screen, zoom and track function
- Dimensions: 260 x 390 x 100mm
- PVC (Print Via Computer) software is included and allows you to transfer data directly from the instrument to your PC

Code	Code Description

Jenway 72 Series Spectrophotometers

The 72 Series Spectrophotometers use diode array technology to produce exceptionally fast results. With a large colour touchscreen user interface, this range is simple to set up and navigate. Results can be saved to USB memory stick or printed using the optional printer. This spectrophotometer has mea modes for photometrics, concentration, optical density, quantitation scanning and kinetics.

- Not affected by ambient stray light and so can be used with the lid open
- Supplied with a 10x10mm cuvette holder fitted as standard
- Small footprint and very lightweight (2.8kg)
- Optional heated cell accessories available temperature control of 37°C ±5°C. resolution of 0.5°C
- 2 year warranty (1 year on lamp)

Jenway 3510 Bench pH/mV Meter

A versatile, simple to use pH, mV and temperature meter ideal for routine analysis. With up to three decimal place resolution and a choice of up to three calibration points the 3510 provides the user with added flexibility. A choice of pH calibration buffers to DIN, JIS and NIST standards can be used for automatic calibration, as well as manually entered buffer values.

- Simultaneous readout of pH and temperature
- pH resolution to 3 decimal places
- 1, 2 or 3 point calibration
- Automatic or manual buffer selection
- Storage of up to 32 results
- RS232 connection to printer or PC via DataWay
- Supplied with pH electrode stand and holder, ATC probe, BNC shorting plug, pH 4, 7, and 10 buffer sachets, and UK power supply

SLS Lab Pro PurA-Q+ Type 1 & 2 Water **Purification Systems**

Combine ultrapure and DI water in one unit saving you money and space. Type 2 water is ideal for buffer, reagent & media preparation, sample dilution and general chemistry. Type 1 is perfect for the most sensitive applications such as cell & tissue culture, molecular biology, electrophoresis, chromatography & spectroscopy and with ultra-filtration included the PurA-Q+ is ideal for RNase/DNase free work too.

- Main unit wall, bench or reservoir mounted
- Variable speed motor saves energy when not in use - reducing running cost and noise
- Novel recirculation loop extends consumable life
- TOC water quality monitoring (ppb 1-5)
- Ultra-filtered nuclease free and endotoxin <0.001EU/mL
- Built-in boost pump means low feed pressure (0.1 bar min.) is not an issue

KNF Laboport® Type N 96 Vacuum Pump

The smallest chemical resistant pump in the new Laboport® series, the N 96 combines a high flow rate with a compact design, saving valuable space in the laboratory. Thanks to the manual rotational speed control, the N 96 is quiet, very energy efficient, and can be optimally adjusted in accordance with the application. Potential applications include filtration, SPE, and liquid aspiration using a vacuum.

- Flow rate of 0.3 0.42m³/h, ultimate vacuum of <130 mbar abs
- Very small footprint
- Integrated rotational speed control
- PTFE-coated diaphragm for use with aggressive/corrosive gases and vapours
- Easy to clean surface

Code	Delivery, L/min	Ultimate Vacuum, mbar	Dims, w x d x h, mm	List Price, £	Offer Price, £

KNF Laboport® Type N 820G/N 840G Vacuum Pumps

The N 820 G and N 840 G feature a control knob for manual adjustments of the flow rate. Due to the integrated rotational speed control, the pumps are quiet, very energy efficient, and can be optimally adjusted. These pumps are ideal for working with extremely aggressive/corrosive gases and vapours. Potential applications include rotary evaporation, distillation, gel drying, degassing, use by vacuum ovens and vacuum concentrators.

- Adjustable flow rate of up to 2.04m³/h
- Ultimate vacuum of 6 mbar abs
- 3-colour status display: in operation/stand-
- ATEX-compliant in accordance with II 2/-G IIB+H2 T3 internal atmosphere only
- 100% oil-free transfer to ensure uncontaminated transfer, evacuation and compression

Stuart SRT6 Roller Mixer

These roller mixers provide a gentle, but highly efficient, rocking and rolling action. The six roller design has a small space saving footprint.

- Detachable roller tubes to accommodate larger vessels
- Removable side panels ensure bottles do not slide off mixer
- Units can be stacked using dedicated accessory (please enquire for details)
- Units can be used in incubators between 4 and 60°C
- Green lit switch on/off button
- Designed for continuous quiet operation

Benchmark MultiTherm[™] Shaker

32%

The MultiTherm™ shaker is a temperature controlled vortexer, useful for a variety of molecular biology applications. Despite its modest 8 x 11 inch footprint, all popular tubes and plates are compatible, including as many as six 50mL tubes. Speed, time and temperature settings are continuously visible on the LCD, simultaneously

showing both actual and selected values. Integral over-temperature control ensures long life, safety and sample integrity.

- Temperature control from 0 to 100°C
- Exchangeable blocks, for tube sizes 0.2 to 50mL
- Precision contoured wells for uniform thermal transfer
- Sequence link function for linking or repeating programs (HC model only)
- Blocks sold separately

LTE IP Series Incubators

The IP Series of incubators offers maximum flexibility and unparalleled performance with fast heat-up times, almost undetectable overshoot and superb accuracy make the IP Series a class-leading product.

U models: uni-program system offers single temperature selection and control. Following a mains power failure, the controller will automatically reinstate.

M models: multi-program controller allows up to 8 multiple-step cycles to be stored in the memory. It incorporates a selectable temperature ramping function, which allows controlled temperature rise and fall rates to be programmed into a cycle. At the end of a program sequence, the controller can be programmed to stop or repeat the sequence again. Following a mains power failure, M models have 3 recovery options.

- Temperature range 30 to 80°C
- Digital display of set and actual temperatures (and programmed features on M models)

- Class 2 over-temperature protection
- Stainless steel radiused interiors
- Anti-bacterial epoxy powder coating

Astell Square Eco Front Loading Autoclaves

The ECO range is designed to be water efficient, with Autofill and Autodrain options fitted as standard, and low in power consumption by utilising 16kW heaters in chamber across the range. With simplicity and economy in mind, the range is ideal for sterilising typical laboratory loads such as media, waste (discard) and glassware.

- 316 stainless steel electropolished chamber
- Assisted air cooling
- · Cooling lock
- Electrically heated steam generators
- Five password levels to stop lower level users making changes
- Five pre-programmed cycles and up to 50 available
- Manual sliding door operation
- Over temperature protection
- Temperature range of 100 to 138°C (0.2 2.4 Bar)

- Timed/pulsed free steaming
- Fully programmable 5.7" colour touch screen controller
- Validation port

Haier Low Energy ULT Freezer

Versatile personal ULT freezer with a stackable, on or under counter design. HC green refrigeration and cabinet design reduces energy consumption to just 5.5kWh/day.

- Reliable performance
- Reduced operation noise
- Energy saving
- 1 shelf and 2 inner doors
- Temperature range -40 to -86°C, with uniformity within 5°C

Grant CRF-1 Liquid Nitrogen and Cryogen Free Controlled Freezers

• Dims. w x d x h: 369 x 266 x 453mm

• Weight: 9.8kg

The CRF-1 poses no contamination risk and can be used in cleanrooms and barrier facilities. Its performance in terms of cell viability after freezing is comparable or better than standard liquid nitrogen freezers. The cooling rate is precisely controlled, ensuring accuracy and reproducibility throughout the freezing profile, ensuring optimal recovery of cells upon thawing. The CRF-1 will cool down to -100°C with straws

- Linear and non-linear cooling profiles
- Standard, preset and custom cooling profiles
- Temperature remains at -100°C at the end of cycle for straw applications until freezer is switched off
- Can be run as a stand alone pre-programmed unit or connected to a control PC

ClearLine® CryoGen® Tubes

Innovative screw caps eliminate leakage and contamination. Screw caps are co-moulded with a thermoplastic elastomer (TPV) layer and are 95kPa certified to provide a 100% leak-proof seal.

- Human DNA, DNase, RNase, Pyrogen, ATP, PCR inhibitor free
- Sterile Sterility Assurance Level (SAL) of 10-6
- CE-IVD marked
- Certified IATA PI 650
- Working temperature: down to -196°C
- Printed graduations and standard code
 128 barcode on each vial
- Autoclavable at 121°C steam for 20 minutes
- Centrifuged at: 14,000 RPM / 19,000 x g

Supplied in packs of 500 (inner sealed zip bags of 50 with sterilisation indicator)

ClearLine® CryoGen® Tube Freezer Boxes

These durable polycarbonate cryogenic storage boxes are designed to be used at temperatures between -196 and +121°C and are autoclavable at 120°C for 20 minutes

- Break-resistant, durable polycarbonate
- Writing area on the cover and on the bottom for an easy identification
- Numbered lid for an easy tubes positioning
- Suitable for 1 to 2mL tubes

Grant UV Air Cleaner-Recirculators

Easy to use UV cleaner-recirculator ideal for air disinfection in hospitals, research laboratories and clinics. Consists of a germicidal UV lamp, a fan unit equipped with dust filters and a control unit confined in a flow through chamber.

- Full user protection from direct UV radiation
- Extremely quiet operation
- Air flow productivity: 14m³/h
- UV lamp operation indicator, indicator light turns off when the lamp needs replacing
- · Convenient fixation on walls or mount on a movable tripod (sold separately)

Haier Air Purification Steriliser

Haier Biomedical

Features a triple disinfection technologies, cleaning air to class 100,000 cleanliness. Plasma disinfection, ultraviolet and titanium dioxide photocatalyst disinfection and nano-silver ion filtration layer disinfection together ensures a bacterial and virus killing rate of > 99.9%.

- Utilises HEPA and carbon filter technologies to reach class 100,000 cleanliness after operating for 1 hour (<60m³)
- · Negative ion generator releases negative ions with a concentration of over 3 million ppm/cm creating fresh air indoors
- Air quality automatically displayed
- Filter and UV light replacement reminders
- Timed shutdown function
- Optional smart air control mode adapts air speed function to provide optimal air quality
- Automatic quiet mode switches when light levels drop (night)
- Fault warning alarms sound if filter or UV light is in fault
