

Glass Oven B-585 Kugelrohr

The universal equipment for your lab

Regardless if you need an equipment for distillation, sublimation, freeze-drying or drying of small samples - the Glass Oven B-585 Kugelrohr offers it all.

Versatile

For multiple applications:
Sublimation, freeze-drying,
distillation or even drying

Efficient and gentle

Highly energy efficient and
gentle sample treatment

Ease of use

Easy and intuitive
operation

B-585 Kugelrohr: Your most important benefits

Versatile

Manifold capabilities:

- Sublimation, freeze-drying, distillation or drying
- Ideal for small sample sizes
- Adjustable to your needs with a broad range of accessories and options

Efficient and gentle

- Fast and energy efficient heating
- Space savings due to its unique and compact design
- High yield by gentle sample treatment
- Avoids cross contamination

Ease of use

- Easy and intuitive by simple operation
- Visual monitoring of sample chamber

Complete your portfolio

**Vacuum Pump
V-100**
Economical
vacuum source

**Interface
I-100**
Economical vacuum
regulation

**Rotavapor®
R-300**
Convenient and efficient
rotary evaporation

**Melting Point
M-560 / M-565**
Determination of
melting point
