Technical Data Sheet

Spectroquant[®] Prove Spectrophotometer 600 plus 1.73028

SOOt

We provide information and advice to our customers on application technologies and regulatory matters to the best of our knowledge and ability, but without obligation or liability. Existing laws and regulations are to be observed in all cases by our customers. This also applies in respect to any rights of third parties. Our information and advice do not relieve our customers of their own responsibility for checking the suitability of our products for the envisaged purpose.

The life science business of Merck KGaA, Darmstadt, Germany operates as MilliporeSigma in the U.S. and Canada.

Wavelength range 190 - 1,100 nm Many type Kenon flash imp dessuring modes Concentration, absorbance, transmission, multi wavelengths, spectra and kinetics in absorbance and transmission mode dipending the producbility 1.4 - the correlation of spectral bandwidth to resolution for a boluene in hexane solution standard measured at ambient temperature 25 °C. Wavelength resolution 1 nm (Gran 0.1 nm) Wavelength resolution 1 nm (Gran 0.1 nm) Wavelength resolution 0.001 Abs Wavelength recolution 0.001 Abs	1.73028.0001 - Spectroquant Measuring technology	Spectrophotometer with reference beam technology
amp type Xenon flash Jamp Jeasuring modes Concentration, absorbance, transmission, multi wavelengths, spectra and kinetics in absorbance and transmission mode Jeasuring modes 1.8 nm Oldene/hexane ratio > 1.4 - the correlation of peptral bandwidth to resolution for a toluene in hexane solution standard messured at ambient temperature 2.5 °C Wavelength resolution 1 nm (Scan 0.1 nm) Wavelength resolution 1 nm (Scan 0.1 nm) Wavelength accuracy # 1 nm Wavelength accuracy # 1 nm Wavelength accuracy # 1 nm biotometric range # 3.3 Abs biotometric range # 3.3 Abs biotometric range # 3.3 Abs biotometric range # 2.30 - 900 nm biotometric range # 2.30 - 900 nm biotometric * 0.004 absorbance * 1.004 absorbance cian Lintis freely selectiable within the wavelength range increment? 0.17/15 nm mart Screen Display Display p-cap gas touts raren U barcode Aubarabie 2.50 and 100 mm rectangular cells with automatic recognition tinning wolumes 16 mm round cells, 4 ml 10 mm roade gains 4 m		
lessuring modes Concentration, absorbance, transmission, multi wavelengths, spectra and kinetics in absorbance and transmission mode leactal bandwidth 1.8 nm oblener/lexame ratio > 1.4 - the correlation of spectral bandwidth to resolution for a toluene in hexane solution standard measured at ambient temperature 25 °C.
