

High Throughput Meets Regulatory Compliance

NanoPhotometer® N120

12 Channel NanoVolume

Microvolume Capability

Measure up to 12 samples per run with only 2 μ I per sample

Full Scan

1.7 - 2.5 seconds per sample20 seconds for 12-sample full scan200 to 900 nmResolution better than 2.5 nm

Regulatory Compliance, Certainty in Real Time and IQ/OQ Package

Optional CFR21 software provides password protected role based access control (RBAC), data integrity, electronic signatures and audit trail functionality Impurity and air bubble recognition with Sample Control™ and Blank Control™ Compliant with international standards in regulated environments

WiFi

HotSpot

LAN

Endless Connectivity

Built-in File Server for data access from Windows and Mac computers Print to Airprint™ and HP Universal Driver compatible printers as well as DYMO Label printers REST API for LIMS integration

Battery Powered

Up to 3 hours battery operation

Flexible Unit Control and Ultimate Data Security

Computer (Windows & Mac)
Built-in touchscreen
Tablet (Android OS & iOS)
Proprietary NPOS immune
to known threats

World's smallest footprint in its class: only 20 x 20 x 12 cm Ideal for nucleic acids, protein and samples in most organic solvents

Air bubble recognition, Blank Control™ and Sample Control™ to ensure quality readings

No reconditioning, no recalibration and no regular maintenance ever

Stand-alone operation with built-in 7 inch glove compatible touch screen

Universal data output: Excel and PDF | Multi Language User Interface | Barcode ready

128 GB of onboard memory

Reviews

"Really impressed with the accuracy..."

Rating: 5.0 \star \star \star \star Application Area: DNA Analysis

"I've really been impressed with the accuracy, ease of use, and increased sample throughput with this instrument. The touch screen interface is a nice feature and very straightforward. You can easily navigate through the applications, load templates, access and analyze your data. I like that you're given the option to run up to 12 samples but you can also choose to run 1 or 2 samples. Having options is always a plus and you get that with the N120. The pipette guide makes it really easy to apply your samples. I can see that a lot of time, expertise, and careful considerations went into developing the NanoPhotometer."

"Great results and very accurate!"

Rating: 5.0 $\star\star\star\star\star$

Application Area: Protein assays and concentrations

"I love love love this machine. It's portable, idiot proof, and accurate. For its DNA analysis, it is much more accurate than the old familiar... . I love the fact that it is so modifiable and easy to use. We use it for a variety of functions in the lab, including Bradford assays. I really love that there is a built-in graph for these and that you can email it to yourself or save on a USB stick. This machine is the thing we have all been needing but never knew we missed. Also the customer care is outstanding and I look forward to our rep every time she comes."
